FRANK ADVICE	Start talking to your adviser as early as possible and explore the many options available to you!
ADVICE FOR STUDENTS WITH AP CREDIT	Consider taking more advanced MATH (211/212), organic chemistry or the introductory CHBE courses during your freshman year. Contact Ken Cox (krcox@rice.edu) for advice.
ALTERNATIVE CURRICULA	Students following the B.S. program can use their electives to create a concentration or focus area in one of five disciplines: biotechnology/bioengineering, environmental engineering, computational engineering, energy and sustainability engineering, or materials science and engineering. The more flexible B.A. program allows students to pursue a double major.
BS VERSUS BA	Our department offers two undergraduate degrees: the Bachelor of Science in Chemical Engineering (B.S.Ch.E.) and Bachelor of Arts (B.A.) degree. Only the program leading to the B.S.Ch.E. degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, http://www.abet.org. The B.S.Ch.E. degree is the more appropriate path for students wanting to pursue a professional career in the field of chemical and biomolecular engineering. The B.A. program is more flexible and allows a student to pursue other areas of interest or prepare for professional careers in medicine, law or business.

NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES	Biochemistry, numerical analysis, cell biology, courses on environmental studies (ENST), other courses listed in the specialization areas.
RESEARCH AND INTERNSHIPS	Most ChBE majors participate in undergraduate research, either through the courses (CHBE 495 or CHBE 499) or through summer research internships. For further information on research opportunities talk to ChBE undergraduate advisers or contact directly the faculty whose research interests you. Most students also pursue industrial or national lab internships.
STUDY ABROAD	Study abroad semesters are possible and encouraged. Keep in mind that core ChBE courses are offered only once a year, and some courses are somewhat hard to match. With advanced planning however, several international locations work for ChBE students, who commonly go abroad in their sophomore or junior spring terms.
PROFESSIONAL ORGANIZATION	The American Institute of Chemical Engineers (AIChE) has a very active student chapter at Rice that provides real-world experience with internships at sponsor companies, talks on technical, career, and professional topics, scholarships, etc. See http://aiche.rice.edu for details on membership, meetings and more.

** In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.*

• When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.

•• When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.

§ When registering for CHEM 211, you must also register for CHEM 213, the discussion section for 211.

BASIC REQUIREMENTS	General math & science courses	41
	Core courses in major	31
ELECTIVE REQUIREMENTS	Open electives and LPAP	39
	FWIS and distribution courses	21
	Minimum credit required for the B.A.	132

Of the 132 total degree credits, the B.A. in Chemical Engineering requires 72 credits in general math and science courses and core courses.

Major Requirements
