**School Of  
Engineering**

# UNDERGRADUATE ADVISING

---

FALL 2016

This advising booklet provides only the first step toward the design of your Rice education. Your divisional advisor is a crucial ally who will help tailor a plan of study that best fits your inclinations and aspirations.

Student-faculty interaction is a trademark of Rice education. Consult regularly with your divisional advisor, one of the many faculty members waiting to work with you in the coming years.

<b>44</b>	Materials Science and NanoEngineering
<b>50</b>	Mechanical Engineering
<b>56</b>	Statistics
<b>60</b>	Major Advisors
<b>61</b>	Divisional Advisors
<b>62</b>	Requirements for Bachelor's Degrees

*This booklet is intended to give you, as a freshman engineering student, an overview of the undergraduate degree programs in the School of Engineering. It includes some general advice and contact information along with degree summaries and sample degree plans for each engineering degree.*

*The degree summaries and sample plans will help you compare majors and provide a starting point for mapping out your own course schedule. The booklet is intended as a supplement to, not a replacement for, other department advising materials. Although we have worked hard to make this booklet as accurate as possible, the information in the General Announcements is the final authority on degree requirements and academic regulations at Rice.*

## **Two Kinds of Faculty Academic Advising**

Every incoming engineering student is assigned an Engineering Divisional Advisor—a faculty member from the School of Engineering who is associated with your residential college and who provides academic advising to students considering engineering majors. You should consult with your Divisional Advisor prior to registering for classes each semester. You may also consult with major advisors before declaring a major. See page 60 for a complete list of advisors.

When you declare your major, the department will assign you to an academic advisor within the department. Your departmental advisor will help you decide what courses you will take to satisfy your degree requirements and when you should take them.

The School of Engineering strongly encourages students planning engineering majors to declare their majors in the spring semester of their freshman year before registering for the sophomore year. Declaring a major in the freshman year should not discourage you from continuing to discuss degree plans with as many advisors as you wish (divisional or departmental, inside or outside of Engineering). Many students are looking at more than one field in their freshman year. However, if you wait until the end of the sophomore year to choose a major, it may be difficult to complete a degree in four years.

## **Advanced Placement Credit and the Sample Degree Plans**

Many entering freshmen come to Rice with substantial Advanced Placement course credit, particularly in math, physics and chemistry. Talk with your Divisional Advisor and the instructors in the relevant courses if necessary, to determine whether your background has prepared you for more advanced courses at Rice. The sample degree plans in this booklet assume that you have no AP or transfer credit. Each sample is also only one of many possible schedules. Talk with your Divisional Advisor and a department academic advisor if necessary, to begin developing a degree plan that fits your situation and goals.

---

## **Freshman Writing Intensive Seminars**

Unlike all other courses at Rice, you are assigned a specific semester in which to take a Freshman Writing Intensive Seminar. Therefore, if you plan to pursue an Engineering major, you need to carefully consider these courses during registration to make sure that you are able to get into a section that does not have a time conflict with courses that are required for your major.

In all of the sample schedules throughout this book, the FWIS course is listed in the Fall of the Freshman year and there is at least one Distribution course listed in the Spring of the Freshman year. If you are assigned to take an FWIS in the Spring, you should swap the semesters of the FWIS and a Distribution course in the Freshman year. For further information about the FWIS requirements, please visit <http://pwc.rice.edu/>.

## **Selecting Courses in the Major**

You will see on many of the degree summaries that you often have choices for courses. For example, a degree may require physics, but allow you to choose either PHYS 101 or PHYS 111. Several of the sample plans or degree summaries note these choices so that you are aware of your options. Sometimes a department will specify a preferred course, sometimes not. Consult other department advising materials and/or talk to the department advisors for more information.

## **International Engineering**

Every department in the School of Engineering strongly encourages its students to incorporate international experiences into their education at Rice. Academic advisors in your department can help you determine appropriate course work for study abroad and the Office of Study Abroad can help make arrangements.

Information on research and industrial internships abroad can be found at <http://enr.rice.edu/engineersabroad/>. Financial support is available for some of these opportunities. See the website for more details. Many other opportunities for international experiences are available through Engineers Without Borders ([ewb.rice.edu](http://ewb.rice.edu)) and Rice 360° Institute for Global Health ([rice360.rice.edu](http://rice360.rice.edu)). If you are interested in making a difference in people's lives through these organizations, see their web sites for more information.

## **Rice Center for Engineering Leadership**

A career in engineering will require you to become a key member of an engineering team, a team leader, or maybe even to start a business based on your ideas. The Rice Center for Engineering Leadership (RCEL) will prepare you for these challenges with the RCEL Certificate in Engineering Leadership. You'll get an introduction to engineering leadership in ENGI 140, focusing on learning personal strengths, motivations, and aspirations as leaders, acquire hands-on experience leading a team through engineering challenges in ENGI 218/219, learn how to interview for and land industry or research internships, and learn state-of-the-art practices for leading teams and innovation in ENGI 315. To learn more about RCEL and the Certificate in Engineering Leadership go to <http://rcel.rice.edu>.

# DESCRIPTION OF MAJORS

---

## OFFERED BY DEPARTMENTS

### **Bioengineering**

The overall goal of the B.S. degree in Bioengineering (BSB) is to prepare graduates to succeed in professional careers by equipping them with the conceptual and technical expertise sought after by top graduate and medical schools, as well as companies seeking technical skills in bioengineering. Recognizing that graduates may embark on a number of different educational and career paths, the educational objectives that graduates are expected to exhibit or achieve with the BSB from Rice University are:

- 1.** Graduates demonstrate technical and/or professional skills, which may include engineering problem-solving, scientific inquiry, and/or engineering design, to solve challenging problems in bioengineering and related fields.
- 2.** Graduates are accomplished at communicating and working collaboratively in diverse work environments.
- 3.** Graduates seeking further education at graduate, medical or other professional schools find appropriate levels of success in admission to and progression through these programs. Graduates entering professional careers find appropriate career progression and success.

---

## Chemical and Biomolecular Engineering

Our department offers two undergraduate degrees: the Bachelor of Science in Chemical Engineering (BSChE) and Bachelor of Arts (BA) degree. Only the program leading to the BSChE degree is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

In today's rapidly changing business climate, industrial sectors from petrochemicals to biotechnology and semiconductor manufacturing offer a wide variety of employment opportunities to our graduates. As a result, chemical engineering graduates may get involved with (among others):

- the development of new processes and products for the chemical industry;
- exploration, production and refining of oil and natural gas;
- design and optimization of fabrication facilities for semiconductors or magnetic storage devices;
- production of advanced materials from plastics and fibers to catalysts and biomaterials;
- design of water and air pollution control devices;
- production of pharmaceuticals and biologic devices for medical applications.

Although industry employs the majority of chemical engineering students receiving a bachelor's degree, a large fraction of our graduates continue their education in graduate schools to prepare for academic or industrial R&D careers, and in medical, law or business schools.

## Civil and Environmental Engineering

The oldest of the recognized "disciplines" in engineering, Civil and Environmental Engineering addresses a broad range of current issues related to materials, computational mechanics, urban systems, smart structures and infrastructure, water, energy, pollution, risks, disasters and sustainability. At Rice, CEE offers a choice among four educational foci: Environmental engineering, hydrology and water resources, structural engineering and mechanics, and urban infrastructure, reliability and management.

CEE prepares leaders who can deal with present and future technical and societal problems. We provide a rigorous, coherent curriculum from which students gain an understanding of the physical, mathematical, chemical and biological, as well as socio-economic systems that affect engineering research and practice. We emphasize design and the development of professional communication skills and strategies, especially those requiring collaboration and teamwork.

Our internship program places students in companies throughout Houston and the U.S. To prepare for the global workplace, we offer international service learning experiences that focus on solving complex engineering problems in diverse cultural situations. For example, you may want to become involved with Rice's nationally recognized Engineers Without Borders, a student-run organization that works to bring sustainable technologies to developing regions of the world like Central and South America. The educational experience in CEE is fun and unique because of its strong emphasis on student leadership and its integration of undergraduate education with cutting-edge research.

## Computational and Applied Mathematics

Our graduates have enjoyed an excellent job market for decades and can expect to be hired in engineering consulting, government, regulatory agencies, industry and academia.

In the CAAM undergraduate program, students learn to apply the advanced techniques needed to model and analyze complex physical systems. The curriculum provides a sound grounding in underlying mathematical theory, emphasizes a variety of useful mathematical techniques, and helps students develop proficiency in computational modeling and high performance computing. Graduates with degrees in computational and applied mathematics are in demand in industry, government and academia, where they often join with physical and biological scientists, engineers, and computer scientists to form teams. Such interdisciplinary teams represent the modern approach to dealing with complex problems whose solutions require mathematical and scientific skills.

## Computer Science

An education in Computer Science includes training in systems design, implementation (i.e., programming), mathematics, and the analysis of algorithms, systems and problems. A computer scientist must understand what can be computed, what can be computed quickly, and what can be built. The undergraduate Computer Science curriculum at Rice includes a core set of courses that teach skills common to all areas in Computer Science, as well as specialized courses that delve more deeply into specific areas such as artificial intelligence, bioinformatics, computer architecture, databases, graphics, networking, programming language design and implementation, physical algorithms, security and verification. We welcome students with little or no programming experience. Computer science requires the ability to think clearly and analytically; we can teach you the rest.

With computing integrated into every facet of modern life, a computer science degree can lead to many diverse careers. We develop tools that enable fields such as scientific simulation, financial market analysis, medical imaging and robotic exploration.

## Electrical and Computer Engineering

Electrical and Computer Engineering (ECE) is the creation, innovation and design of technologies in computing, communications, electronics and automation. ECE is at the crossroads of hardware and software—the integration of these tools to create better, faster, safer technologies for things like cars, aircraft, computers, smartphones and surgical robots. We invent and develop technologies and devices for the betterment of humanity.

ECE's flexible programs educate engineers and scientists to be leaders in academia, industry and government. ECE graduates go on to work in almost every field imaginable, including healthcare, energy, law, the space industry, entertainment and security. The opportunities are broad; the major has many avenues for interdisciplinary learning and collaboration.

Undergraduates are encouraged to participate in research by contacting ECE faculty directly or through the Vertically Integrated Projects (VIP) program. Summer internship opportunities are available in ECE labs, with our industrial affiliates, and through the Nakatani RIES Fellowship Program.

At Rice, ECE faculty rewire and study the brain to combat Parkinson's, epilepsy and PTSD. They build lensless cameras, explore oil reservoirs, and bring wireless technology to the underserved. They push the state-of-the-art in national security, healthcare, data science, photonics, neural engineering, communications and laser spectroscopy.

## **Materials Science and NanoEngineering**

Materials science is concerned with the processing, structure, properties and performance of materials used by society. These include metals and their alloys, semiconductors, ceramics, glasses, polymers, composites and nanomaterials. The materials scientist is interested in applying principles of math, physics and chemistry to design, produce, characterize and utilize the materials necessary for today's engineering. The Materials Science and Nanoengineering curriculum provides students with the requisite skills and educational background to contribute to the solution of many materials and nanoengineering problems, allow him or her to work in a fascinating field and make it possible to become a leader in one of the most challenging technological areas.

## **Mechanical Engineering**

Mechanical Engineering, one of the broadest and most versatile of the engineering professions, generally deals with the relations among forces, work or energy, and power in designing systems to improve the human environment. The products of their efforts may be automobiles or jet aircraft, nuclear power plants or air-conditioning systems, large industrial machinery or household can openers.

The Mechanical Engineering program is designed to prepare the graduate to assume positions of leadership, qualify for admittance to top level graduate programs, contribute to the advancement of knowledge, and to have a strong understanding of engineering professional and ethical responsibilities.

## **Statistics**

Statistics is concerned with the interrelationships between observation and theory. Thus statistics deals with the formulation and application of the scientific method. Important components of statistical studies include probability, mathematical statistics,

model building, statistical computing, quality and process control, time series analysis, regression theory, nonparametric function estimation, experimental design, Bayesian analysis, stochastic processes, sampling theory, biostatistics, bioinformatics, genetics, epidemiology, computational finance, environmentalics, defense analysis and simulation.

The department's goals are to acquaint students with the role played in the modern world by probabilistic and statistical ideas and methods, to provide instruction in the theory and application of techniques that have been found to be commonly useful, and to train research workers in statistics. The undergraduate statistics program is flexible and may be oriented towards theoretical or applied training or towards joint work in a related department, such as Biology, Economics, Education, Electrical Engineering, Computational and Applied Mathematics, Mathematics, Political Science or Psychology.

Statisticians make important contributions in data science, business, finance, biomedicine, economics, engineering, sociology, defense and environmental science. The demand for statisticians at the bachelor's, master's and doctoral levels is one of the highest for any professional group.

# DESCRIPTION

---

## OF ENGINEERING-RELATED MINORS

### **Computational and Applied Mathematics**

The departmental minor in Computational and Applied Mathematics develops a range of skills in mathematical modeling, analysis, and scientific computing that complements any major in science, engineering and economics.

**Summary requirements**

CAAM 210, CAAM 335, (CAAM 336 or CAAM 378), three additional CAAM electives, two at or above the 400 level.

**For details, see**

[www.caam.rice.edu/undergrad\\_minor.html](http://www.caam.rice.edu/undergrad_minor.html)

**Minor advisors**

Yin Zhang, [yzhang@rice.edu](mailto:yzhang@rice.edu)

### **Energy and Water Sustainability**

Sustainability encompasses an approach to design and decision-making that takes into account the economic, social and environmental implications of human activities. This interdisciplinary minor studies the design of safe, secure, sustainable energy and water resources.

**Summary requirements**

CEVE/ENGI 302, CEVE 307, (CEVE 322/ENGI 303 or ECON 480), three electives, and 1-credit design practicum.

**For details, see**

<http://ceve.rice.edu/sustainabilityminor.aspx>

**Minor advisor**

Jim Blackburn, [jbb@blackburncarter.com](mailto:jbb@blackburncarter.com)

---

## Financial Computation and Modeling

The interdisciplinary minor in Financial Computation and Modeling (FCAM) prepares students for quantitative positions in the financial industry. Students are prepared in the advanced quantitative methodologies as well as in the basics of financial markets.

### Summary of requirements

Students take three courses each from two groups (“Basic Tools” and “Financial and Computational Modeling”) of economics and statistics courses.

### For details, see

<http://cofes.rice.edu/content.aspx?id=36>

### Minor Advisor

Katherine Ensor, [ensor@rice.edu](mailto:ensor@rice.edu)

## Statistics

In the modern age of information and data science, the ability to understand, process, analyze and interpret data is critical in every area of human inquiry. The minor in statistics is designed to complement a student’s primary area of study. Two tracks are offered: Track A is designed for students with strong mathematical and computational interests; Track B develops a broad understanding of and appreciation for the correct use of statistical methodologies.

### Summary of requirements

Three specific courses and three elective courses from statistics at the 300 level or higher.

### For details, see

<http://statistics.rice.edu/statminor/>

### Minor advisor

Rudy Guerra, [rguerra@rice.edu](mailto:rguerra@rice.edu)

## Global Health Technologies

The minor in Global Health Technologies (GLHT) offers a unique, multidisciplinary program to educate and train students to reach beyond traditional disciplinary and geographic boundaries to understand, address and solve global health disparities.

### Summary of requirements

GLHT 201 (Bioengineering and World Health), followed by a series of core and elective courses in Science/Engineering and Humanities/Social Science/Policy.

### For details, see

[http://rice360.rice.edu/?doc\\_id+9254#glht-minor/tjd8s](http://rice360.rice.edu/?doc_id+9254#glht-minor/tjd8s)

### Minor advisor

Veronica Leataud Suderland, [vl2@rice.edu](mailto:vl2@rice.edu)

## Mathematics

The departmental minor in Mathematics develops specific analytical problem solving skills, as well as a logical perspective that is valuable in many science and engineering disciplines.

### Summary requirements

Typically MATH 211-212 or 221-222; courses in Analysis, Linear Algebra, and Discrete Mathematics/Algebra; and one additional class at the 300-level or higher.

### For details, see

[www.math.rice.edu/Academics/Undergraduate/MathMinor.html](http://www.math.rice.edu/Academics/Undergraduate/MathMinor.html)

### Minor advisors

Zhiyong Gao, [zgao@rice.edu](mailto:zgao@rice.edu)

Frank Jones, [fjones@rice.edu](mailto:fjones@rice.edu)

Stephen Semmes, [Semmes@rice.edu](mailto:Semmes@rice.edu)

# BIOE

Bioengineering

<b>WEB LINKS</b>	<p><a href="http://bioe.rice.edu/">http://bioe.rice.edu/</a> (general website) <a href="http://bioengineering.rice.edu/undergrad/degree_requirements.aspx">http://bioengineering.rice.edu/undergrad/degree_requirements.aspx</a></p>
<b>FRANK ADVICE</b>	<p>Don't try to rush through this 4-year program. Prerequisites are very important for BIOE classes; since some courses are offered once a year, failure to get the correct prerequisites can put you behind an entire year. You must take ELEC 243 before BIOE 383/5, and MECH 211 before BIOE 372. Get involved in research.</p>
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	<p>Take BIOC 201 or a more advanced math (e.g., MATH 211) during your first year. Consider ENGI 120 or ENGI 128.</p>
<b>ALTERNATIVE CURRICULA</b>	<p>If you are a pre-med student, consult with Health Professions Advising in the Office of Academic Advising. There are a few "extra" courses above the BIOE major that you must complete as a pre-med student.</p>
<b>BS VERSUS BA</b>	<p>BIOE only offers a B.S. degree.</p>
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	<p>BIOE 202 Careers in Bioengineering; take this one hour course in the spring of your freshman year. A series of guest lectures will help you find out what bioengineering is all about.</p>

<p><b>RESEARCH</b></p>	<p>Over 70% of our students participate in research either at Rice or at an institution in the Texas Medical Center. When participating in research at Rice, students can either receive credit as BIOE 400 or BIOE 401, or they can be paid. Students conduct research during the school year as well as during the summer. Contact a faculty member directly if you are interested in working in his/her laboratory.</p>
<p><b>INTERNSHIPS</b></p>	<p>Internships in industry and other universities are available for all levels of students. Rice BIOE also offers several summer research internship opportunities.</p>
<p><b>STUDY ABROAD</b></p>	<p>The best time to study abroad is during the spring semester of the sophomore year; a few students go during the spring semester of the junior year. Typically, students complete technical coursework while abroad. Consult a BIOE advisor early if you are interested in study abroad opportunities.</p>
<p><b>PROFESSIONAL ORGANIZATIONS</b></p>	<p>The Biomedical Engineering Society (BMES) has a student chapter at Rice. They plan activities throughout the year that focus on professional development as well as social interactions between all levels of students and faculty.  <a href="http://www.ruf.rice.edu/~bmes/index.html">http://www.ruf.rice.edu/~bmes/index.html</a></p>
<p><b>INTERESTING COURSES FOR NON-MAJORS</b></p>	<p>The Beyond Traditional Borders program offers a minor in Global Health Technologies. Selected courses for non-majors include GLHT 201, GLHT 360, GLHT 392, GLHT 451, GLHT 452.</p>

# B.S. In Bioengineering

**Specializations:** None Available. Students select technical electives to suit their academic interests and career plans.

## Sample Degree Plan

*THIS IS ONE EXAMPLE OF MANY POSSIBLE SCHEDULES.*

*CONSULT A DIVISIONAL OR DEPARTMENTAL ADVISOR TO CUSTOMIZE YOUR DEGREE PLAN.*

BIOE 440	1	Statistics for Bioengineers
BIOE 44X	2	Advanced Bioengineering Labs (2 of 7, see GA)
BIOE 451	3	BIOE Design I (Must take 451 and 452 the same year)
BIOE 452	3	BIOE Design II (Must take 451 and 452 the same year)
TECH elective**	3	Technical Elective
TECH elective**	3	Technical Elective
TECH elective**	3	Technical Elective

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

\*\* Must have 6 engineering points within 3 TECH elective courses

- When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.
- When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.
- § When registering for CHEM 211, you must also register for CHEM 213, the discussion section for 211.

# CHBE

Chemical and Biomolecular Engineering

<b>WEB LINKS</b>	<a href="http://chbe.rice.edu/undergraduate">http://chbe.rice.edu/undergraduate</a>
<b>FRANK ADVICE</b>	Start talking to your advisor as early as possible and explore the many options available to you!
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	Consider taking more advanced MATH (211/212), organic chemistry or the introductory CHBE courses during your freshman year. Contact Ken Cox ( <a href="mailto:krcox@rice.edu">krcox@rice.edu</a> ) for advice.
<b>ALTERNATIVE CURRICULA</b>	Students following the BS program can use their electives to create a concentration or focus area in one of five disciplines: biotechnology/bioengineering, environmental engineering, computational engineering, energy and sustainability for engineering or materials science and engineering. The more flexible BA program allows students to pursue a double major.
<b>BS VERSUS BA</b>	Our department offers two undergraduate degrees: the Bachelor of Science in Chemical Engineering (BSChE) and Bachelor of Arts (BA) degree. Only the program leading to the BSChE degree is accredited by the Engineering Accreditation Commission of ABET, <a href="http://www.abet.org">http://www.abet.org</a> . The BSChE degree is the more appropriate path for students wanting to pursue a professional career in the field of Chemical and Biomolecular Engineering. The BA program is more flexible and allows a student to pursue other areas of interest or prepare for professional careers in medicine, law or business.

<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	Biochemistry, numerical analysis, cell biology, courses on environmental studies (ENST), other courses listed in the specialization areas.
<b>RESEARCH AND INTERNSHIPS</b>	Most CHBE majors participate in undergraduate research, either through the courses (CHBE 495 or CHBE 499) or through summer research internships. For further information on research opportunities talk to CHBE undergraduate advisors or contact directly the faculty whose research interests you. Most students also pursue industrial or national lab internships.
<b>STUDY ABROAD</b>	Study abroad semesters are possible and encouraged. Keep in mind that core ChBE courses are offered only once a year, and some courses are somewhat hard to match. With advanced planning however, several international locations work for ChBE students, who commonly go abroad in their sophomore or junior spring terms.
<b>PROFESSIONAL ORGANIZATION</b>	The American Institute of Chemical Engineers (AIChE) has a very active Student Chapter at Rice that provides real-world experience with internships at sponsor companies, talks on technical, career, and professional topics, scholarships, etc. See <a href="http://aiche.rice.edu">http://aiche.rice.edu</a> for details on membership, meetings, and more.

## Civil and Environmental Engineering

<b>WEB LINKS</b>	<a href="http://ceve.rice.edu/undergrad/">http://ceve.rice.edu/undergrad/</a>
<b>FRANK ADVICE</b>	Make a 4-year plan early on to know what the major entails; update as you go. Consult with advisors if in doubt. Don't overload your schedule in the first two semesters; try to get the prerequisites out of the way and aim to take 15-18 credits per semester. Take CEVE 101 in the freshman year to get a broad overview of courses and research in the department. Take CEVE 481 in the fall term and CEVE 480 in the spring of your senior year. Try studying in groups, after your own reviews, to enhance learning and critical discussion skills. Join and actively participate in student and professional organizations.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	With at least a 4 on AP exams, you may not need to take courses such as Physics, Chemistry, Calculus or Biology. If you feel you are ready, you can take higher level courses or honors courses. You can also get started with your master's degree in the last one to two years.
<b>FWIS AND DISTRIBUTION</b>	You are required to complete 24 credit hours of FWIS and distribution; this is a great opportunity to take courses in subject areas that interest you such as Art, Philosophy and Languages.
<b>BS VERSUS BA</b>	The BS is the only program accredited by the Engineering Accreditation Commission of ABET, <a href="http://www.abet.org">http://www.abet.org</a> . With specialization in one of four areas: environmental engineering, hydrology and water resources, structural engineering and mechanics, and urban infrastructure, reliability and management, the BS is recommended for those interested in graduate studies or careers as licensed professional engineers. The BA offers tracks in environmental engineering and civil engineering. It is recommended for students interested in graduate studies outside of engineering such as policy, law or medicine and is a great route if you are interested in a double major or a minor, such as the one in Energy and Water Sustainability.

<b>NOT REQUIRED BUT SUGGESTED COURSES</b>	CEVE 304 Structural Analysis I, (required for students in the structures and mechanics specialty), CEVE 322 Engineering Economics, CEVE 313 Uncertainty and Risk in Urban Infrastructures, CAD/CAE course (CEE tutorial), and Fondren Library's Introduction to GIS.
<b>RESEARCH</b>	Students are encouraged to seek undergraduate research experience with CEE faculty members. All faculty hire undergraduates year round. Find out early on what research you might be interested in. Talking with professors and expressing interest in their research will give you an advantage. CEVE 101 will give you the chance to meet the faculty and learn about their research.
<b>INTERNSHIPS</b>	All students are encouraged to apply for summer internships. The ASCE student chapter is a great resource, as is the Center for Career Development's job fairs. Internships don't have to be with an engineering firm; any interest area is appropriate and has more leverage if related to your career focus. Approximately 70% of CEE students participate in internships.
<b>STUDY ABROAD</b>	For engineering majors in general, study abroad can be challenging but can be done. Some required Rice classes may not be offered at universities abroad. Plan to go abroad in the spring of the sophomore year or fall of the junior year. Consider joining Engineers without Borders, which provides the opportunity to implement engineering projects in developing countries. Approximately 30% of CEE students pursue international travel and study abroad programs.
<b>PROFESSIONAL ORGANIZATIONS</b>	ASCE (American Society of Civil Engineers) student chapter, EWB (Engineers without Borders), Chi Epsilon Honor Society , Earthquake Engineering Research Institute (EERI).
<b>INTERESTING COURSES FOR NON-MAJORS</b>	CEVE 101 Fundamentals of Civil and Environmental Engineering, CEVE 310 Principles of Environmental Engineering, CEVE 307 Energy and the Environment, CEVE 406 Intro to Environmental Law, CEVE 313 Uncertainty and Risk in Urban Infrastructures.

# B.A. In Civil & Environmental Engineering

## (Track E: Environmental Core Curriculum)

**Specializations:** Courses labeled as SPEC cover topics in which environmental engineering and other disciplines share a common interest. Take 7 courses from electives approved by an advisor assigned by the CEE Dept., including 4 from one specific focus area. Of these 7 electives, 4 must be 300 level courses or above, and 2 of these upper-division courses must be from the CEE curriculum. Examples of areas of specialization include Environmental Science and Engineering, Civil Engineering, Biology, Chemical Engineering, Chemistry, Economics or Management

\*\* The Engineering Specializations are broken down into 4 focus areas.

\*\*\* For focus areas 1 and 2

• Environmental Engineering - CEVE 302, 307, 308, 404, 406, 411, 434 or other approved course.

• Hydrology and Water Resources - CEVE 412, 418, 420, 512, 518 or other approved course.

• Structural Engineering and Mechanics - CEVE 304, 400, 405, 407, 408, 427, 476 or other approved course.

• Urban Infrastructure, Reliability and Management - CEVE 313, 322, 424, 452, 460, 470, 479, 492 or other approved course.

• When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.

•• When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.

† List of CEVE Suggested Electives Courses (in addition to 500-level CEE courses, and select courses from MECH, CAAM, CHEM, ECON, STAT, and math or science, which are posted online at <http://ceve.rice.edu/undergrad/>): CEVE 314, 320, 417, 454, 490, 496, 499

†† For focus areas 3 and 4

# CAAM

Computational and Applied Mathematics

<b>WEB LINKS</b>	<a href="http://www.caam.rice.edu/undergrad_program.html">http://www.caam.rice.edu/undergrad_program.html</a>
<b>FRANK ADVICE</b>	CAAM 210 (Introduction to Engineering Computation) develops important MATLAB skills; most future CAAM classes require more mathematical analysis and less programming. Students with a strong math background and programming experience can potentially take CAAM 210 in the fall of their freshman year.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	CAAM majors with a 5 on the BC Calculus exam should strongly consider the Honors Calculus sequence (MATH 221/222) in place of the MATH 212 (Multivariable Calculus) requirement. Because the content from MATH 212 is spread over both semesters of 221/222 (in greater depth and breadth), students must complete both 221 and 222 in place of 212: but most students find the extra effort to be well worth it.
<b>ALTERNATIVE CURRICULA</b>	Double majors can coordinate some of the CAAM “specialization electives” with classes from their other majors. Students completing a senior design project in another engineering major can usually coordinate that with the CAAM senior design requirement. Please consult a CAAM major advisor to work out a program of study as soon as possible.
<b>BS VERSUS BA</b>	CAAM only offers a B.A. degree.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	Students who intend to pursue graduate study in applied math should take MATH 321 (Introduction to Analysis I) and MATH 322 (Introduction to Analysis II); these students would also benefit from MATH 425 (Integration Theory).

<p><b>RESEARCH</b></p>	<p>Many CAAM majors engage in undergraduate research, either with a CAAM professor or beyond (e.g., in the Texas Medical Center). Students often find a research opening by first making a positive impression on professors through active and constructive participation in class.</p>
<p><b>INTERNSHIPS</b></p>	<p>Summer research internships are often available, too. Many students also pursue industrial or lab internships; notices are posted to the CAAM undergrad email list.</p>
<p><b>STUDY ABROAD</b></p>	<p>Study abroad semesters are possible and encouraged.</p>
<p><b>PROFESSIONAL ORGANIZATION</b></p>	<p>The student chapter of the Society for Industrial and Applied Mathematics (SIAM) offers occasional talks on technical, career, and professional development topics. For membership and meeting details, see <a href="http://www.caam.rice.edu/~siamchapter/">http://www.caam.rice.edu/~siamchapter/</a> for details on membership and meetings.</p>
<p><b>INTERESTING COURSES FOR NON-MAJORS</b></p>	<p>CAAM 210: Intro to Engineering Computation (mathematical modeling and MATLAB programming)  CAAM 335: Matrix Analysis (matrices, linear systems, least squares, eigenvalues)  CAAM 336: Differential Equations in Science and Engineering (Fourier series and finite elements)  CAAM 378: Intro to Operations Research and Optimization (good for math econ (MTEC) majors)  CAAM 519: Computational Science I (scientific programming in C/C++ with advanced math libraries)</p>

# B.A. In Computational and Applied Mathematics

**Specializations:** Four additional quantitative courses at 300 level or above, two of which must be at the 400 level or above. Recommended courses include CAAM 415, 423, 436, 519, 560; MATH 425, 427; STAT 431. Students are strongly encouraged to develop expertise in other disciplines that use computational and applied mathematics.

CAAM 495	2–3	Senior Design Project I
CAAM 496	2–3	Senior Design Project II
Specialization elective	3	300 or above
Specialization elective	3	300 or above
Specialization elective	3	400 or above
Specialization elective	3	400 or above

\* In addition to class hours, these courses have a regularly scheduled lab that must fit into your schedule.

† Students with prior experience with calculus may replace this class with a 3-credit quantitative elective at the 200-level or above, as approved by a CAAM undergraduate advisor. (This quantitative elective is in addition to the four required specialization electives.)

# COMP

Computer Science

<b>WEB LINKS</b>	<a href="http://cs.rice.edu/undergrad/">http://cs.rice.edu/undergrad/</a>
<b>FRANK ADVICE</b>	The sample schedule is the best guide, especially for the first few semesters where it's important to take the core courses. But, generally, take the following as early as possible: COMP 140, 130 or 160, 182, 215, 321 and ELEC 220.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	Computer science AP credit does not count toward the major requirements. If you have AP credit for Math, you should take the upper level math requirements earlier.
<b>ALTERNATIVE CURRICULA</b>	There is a lot of flexibility with the timing of the MATH/CAAM/STAT requirements and the upper-level COMP courses.
<b>BS VERSUS BA</b>	The BS provides more depth than the BA. The only difference in courses in the first two years is the Physics requirements for a BS. Students should speak with a major advisor about the choice of degrees as the best choice depends largely on circumstances and objectives.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	Some popular computer science courses include COMP 330, 410, 430, 440.

<b>RESEARCH</b>	Many computer science undergraduates pursue research. The best way to find out about research opportunities is to talk with faculty who work in areas that you are interested in.
<b>INTERNSHIPS</b>	Internships are plentiful in computer science, some of which are posted on the department web site and emailed to majors. Most students have little trouble finding internships if they are interested.
<b>STUDY ABROAD</b>	With advance planning, it's not difficult to study abroad, even if not taking major-related courses while abroad. Most of the project-oriented courses are hard to get transfer credit for, while the mathematical requirements and theoretical courses are fairly easy to get transfer credit for. Going abroad during the spring semester is easier.
<b>PROFESSIONAL ORGANIZATIONS</b>	Rice University Computer Science Club ( <a href="http://csclub.rice.edu/">http://csclub.rice.edu/</a> ) CSters (Rice University's Society for Women in Computer Science) ( <a href="http://csters.rice.edu/">http://csters.rice.edu/</a> ) ACM Programming Contest – contact John Greiner ( <a href="mailto:greiner@rice.edu">greiner@rice.edu</a> ) for info.
<b>INTERESTING COURSES FOR NON-MAJORS</b>	COMP 130, 140, 160, 162 COMP 182, 435

# B.A. In Computer Science

# ELEC

## Electrical and Computer Engineering

<b>WEB LINKS</b>	<a href="http://ece.rice.edu/academics/undergrad.aspx">http://ece.rice.edu/academics/undergrad.aspx</a>
<b>FRANK ADVICE</b>	Start with MATH, CHEM, PHYS, and COMP requirements to get a solid background. Some of the sophomore core ELEC courses may be taken freshman year, such as ELEC 220, but often ELEC 241, 242, and 261 are best taken in the sophomore year. See the ECE Department undergraduates web page and the IEEE Student Branch Freshman Handbook at <a href="http://ieee.rice.edu/">http://ieee.rice.edu/</a> for additional sample degree plans.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	ELEC 220, ELEC 241, ELEC 242, and ELEC 261 are introductory core courses. Many students take ELEC 261 or ELEC 220 in freshman year. ELEC 241 and 242 may be taken either in freshman or sophomore year, depending on one's math background.
<b>ALTERNATIVE CURRICULA</b>	The ECE Department has elective courses in five specialization areas: Computer Engineering, Data Science, Neuroengineering, Photonics, Electronics and Nano-devices (PEN), and Systems. Computer Engineering focuses on the hardware design aspects of computer systems including computer architecture, VLSI, and hardware description languages. Data Science focuses on data acquisition, data analytics, data storage, and computing infrastructure. Neuroengineering focuses on understanding and treating diseases of the human neural system and networks. PEN focuses on new devices, nanomaterials, ultrafast optics, and lasers. The Systems area focuses on wireless communication systems, digital signal processing, computer vision, and networking.
<b>BS VERSUS BA</b>	ECE offers the traditional BSEE degree for students interested in engineering careers. Only the program leading to the BSEE is accredited by the Engineering Accreditation Commission (EAC) of ABET, <a href="http://www.abet.org">www.abet.org</a> . The BA degree program allows more flexibility for careers in finance, law or medicine.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	ELEC 262 Introduction to Waves and Photonics ELEC 342 Analog Electronic Circuits ELEC 345 Introduction to Computer Vision

<p><b>RESEARCH</b></p>	<p>There are many opportunities for undergraduate independent and team research in ECE, including through ELEC 490. Several faculty have started large-scale Vertically Integrated Projects (VIP) open to freshmen. Summer research opportunities are available through Research Experiences for Undergraduates (REU). Contact faculty directly for more information. ECE has an active Industrial Affiliates Program (contact Jennifer Hunter, hunterj@rice.edu), and encourages students to attend the annual event on April 17, 2017 to meet informally with member companies.</p>
<p><b>INTERNSHIPS AND STUDY ABROAD</b></p>	<p>There are many opportunities in Electrical and Computer Engineering for study abroad and international internships. For example, see <a href="http://nakatani-ries.rice.edu">http://nakatani-ries.rice.edu</a> or contact Sarah Phillips, sphillips@rice.edu.</p>
<p><b>PROFESSIONAL ORGANIZATIONS</b></p>	<p>The Institute for Electrical and Electronics Engineers (IEEE) has an active student chapter and an Eta Kappa Nu honor society at Rice. See <a href="http://ieee.rice.edu">http://ieee.rice.edu</a> for details on the Friday lunch talk schedule and the annual laboratory open house. The IEEE Student Chapter Co-Presidents for 2016-2017 are Jorge Quintero (jaq1@rice.edu) and Vinay Raghavan (vsr1@rice.edu). Also, the ECE Department has an active colloquium series, <a href="http://ece.rice.edu/events.aspx">http://ece.rice.edu/events.aspx</a> with many events co-sponsored by IEEE Houston chapters chaired by ECE faculty.</p>
<p><b>INTERESTING COURSES FOR NON-MAJORS</b></p>	<p>ELEC 220 Fundamentals of Computer Engineering  ELEC 243 Electronic Measurement Systems  ELEC 261 Electronic Materials and Quantum Devices</p>

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

\*\* Comp 140 in the fall followed by COMP 182 in the spring of freshman year is strongly recommended for Computer Engineering.

• When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.

•• When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.

BASIC REQUIREMENTS	General Math & Science Courses	33
	Core Courses in Major	34
ELECTIVE REQUIREMENTS	Engineering Specialization Electives	18–24
	Open Electives and LPAP	19–25
	FWIS and Distribution Courses	24
Minimum credit required for the B.S.		134

Of the 134 total degree credits, the BS in Electrical Engineering requires at least 85 credits in general math and science courses, core courses including the design lab and senior design, and Specialization electives.

## Major Requirements

NUMBER	CREDIT	TITLE
CHEM 121	4*	General Chemistry I w/Lab
COMP 140**	4*	Computational Thinking/Intro to Engineering Computation
ELECTIVE	3	Approved Math or Science elective
ELEC 220	4*	Fundamentals of Computer Engineering
ELEC 240	1	Fundamentals of Electrical Engineering I Lab
ELEC 241	3*	Fundamentals of Electrical Engineering I
ELEC 242	3*	Fundamentals of Electrical Engineering II
ELEC 244	1	Fundamentals of Electrical Engineering II Lab
ELEC 261 or PHYS 202	3	Electronic Materials & Quantum Devices/ Modern Physics
ELEC 301	3	Introduction to Signals
ELEC 303	3	Random Signals
ELEC 305	3	Introduction to Physical Electronics
ELEC 326	3*	Digital Logic Design
ELEC 494(×2)	6	Senior Design (must take fall and spring semesters)
ELEC 327/332/364	3	ECE Design Lab elective
MATH 101	3	Single Variable Calculus I
MATH 102	3	Single Variable Calculus II
MATH 212 or 221	3	Multivariable Calculus/Honors Calculus III
MATH 355/CAAM 335	3	Linear Algebra or Matrix Analysis
PHYS 101•/111	4*	Mechanics w/Lab
PHYS 102••/112	4*	Electricity and Magnetism w/Lab
SPEC	3–4	ECE Specialization elective
SPEC	3–4	ECE Specialization elective
SPEC	3–4	ECE Specialization elective
SPEC	3–4	ECE Specialization elective
SPEC	3–4	ECE Specialization elective
SPEC	3–4	ECE Specialization elective

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

\*\* Comp 140 in the fall followed by COMP 182 in the spring of freshman year is strongly recommended for Computer Engineering.

- When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.
- When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.

# MSNE

Materials Science and  
NanoEngineering

<b>WEB LINKS</b>	<a href="http://msne.rice.edu">http://msne.rice.edu</a>
<b>FRANK ADVICE</b>	Many MSNE students pursue graduate degrees in top graduate schools after earning their BS degree, so undergraduate research experiences are quite important. Research intern experiences also help students obtain industrial jobs after graduation.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	Students with AP credit for Calculus would do well to move the MATH and CAAM sequence up. If the CAAM sequence can be fully completed in the sophomore year, this reduces the junior year pressure and also allows for more opportunities to participate in undergraduate research.
<b>ALTERNATIVE CURRICULA</b>	Not applicable.
<b>BS VERSUS BA</b>	Students are encouraged to pursue the BS degree instead of the BA degree, especially those who plan to pursue a graduate degree.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	See the Undergraduate Program page on our website, <a href="http://msne.rice.edu">http://msne.rice.edu</a>

<p><b>RESEARCH</b></p>	<p>All MSNE majors participate in undergraduate research; some even start during their freshman year. To get involved, speak to a MSNE undergraduate advisor or directly to a MSNE faculty member.</p>
<p><b>INTERNSHIPS</b></p>	<p>Summer research internships are often available through individual MSNE research labs, too. Many students also pursue industrial or government lab internships as well. Notices are posted to the MSNE undergrad email list.</p>
<p><b>PROFESSIONAL ORGANIZATIONS</b></p>	<p>American Ceramic Society (ACerS)  <a href="http://www.ceramics.org">http://www.ceramics.org</a>          Association for Iron &amp; Steel Technology (AIST)  <a href="http://www.aist.org">http://www.aist.org</a>          Materials Information Society  <a href="http://www.asminternational.org">http://www.asminternational.org</a>          Minerals, Metals, and Materials Society (TMS)  <a href="http://www.tms.org">http://www.tms.org</a>          Rice Undergraduate Materials Science and NanoEngineering Society  <a href="http://materialsociety.blogs.rice.edu">http://materialsociety.blogs.rice.edu</a>          Rice Center for eEngineering Leadership(RCEL)  <a href="http://rcel.rice.edu">http://rcel.rice.edu</a></p>
<p><b>INTERESTING COURSES FOR NON-MAJORS</b></p>	<p>MSNE 201 Introduction to NanoEngineering          MSNE 402 Mechanical Properties of Materials          MSNE 406 Physical Properties of Solids</p>

# B.A. In Materials Science and NanoEngineering

# MECH

Mechanical Engineering

<b>WEB LINKS</b>	<a href="http://mech.rice.edu/undergrad">mech.rice.edu/undergrad</a>
<b>FRANK ADVICE</b>	Students should register with Center for Career Development ( <a href="http://ccd.rice.edu/">http://ccd.rice.edu/</a> ) and create a résumé. The CCD maintains RICElink, where potential employers post open positions. If students are sure that they are going to major in mechanical engineering, then they are encouraged to declare their major early in the spring semester of freshman year and see a major advisor to discuss their degree plan.
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	Students with AP credit for Calculus are encouraged to take the MATH and CAAM sequences earlier than suggested in the sample degree plan.
<b>ALTERNATIVE CURRICULA</b>	Double majoring is not encouraged due to the large number of required classes in the BSME degree. If students intend to double major, consultation with a major advisor is encouraged to develop a program of study.
<b>BS VERSUS BA</b>	Only the BS degree is accredited by the Engineering Accreditation Commission of ABET, <a href="http://www.abet.org">http://www.abet.org</a> , and is the most direct route toward becoming a licensed professional engineer (PE). The BA is recommended only for students who will pursue professional careers in medicine, law, or business immediately after their undergraduate education. These students will need to take additional prerequisite classes for these professional post-graduate programs.
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	MECH 403, Computer Aided Design is not required, but is a highly recommended class. In particular, the knowledge gained from this class often helps students obtain summer internships after either sophomore or junior years.

<p><b>RESEARCH</b></p>	<p>Undergraduate research is arranged by talking directly to professors. Students are encouraged to investigate the research profiles of faculty members at <a href="http://mech.rice.edu">http://mech.rice.edu</a>.</p>
<p><b>INTERNSHIPS</b></p>	<p>Most students participate in summer internships in industry, especially after sophomore and junior years. Summer research positions at Rice are often available as well.</p>
<p><b>STUDY ABROAD</b></p>	<p>Study abroad and co-ops are most feasible in the fall semesters of the sophomore and junior years. This avoids conflicts with Lab classes that are difficult to find elsewhere (MECH 331, 332) and also avoids conflicts with the year-long senior design sequence (MECH 407/408).</p>
<p><b>PROFESSIONAL ORGANIZATIONS</b></p>	<p>The American Society of Mechanical Engineers (<a href="http://asme.rice.edu/">http://asme.rice.edu/</a>), which is free for the first year of membership, occasionally hosts industry representatives and organizes outreach, service and design projects.</p> <p>The American Institute of Aeronautics and Astronautics (<a href="http://www.ruf.rice.edu/~aiaa/">http://www.ruf.rice.edu/~aiaa/</a>) organizes presentations, study breaks, and other activities for students interested in aerospace engineering. Many mechanical engineering students are also active in the Rice Engineers Without Borders chapter (<a href="http://ewb.rice.edu/">http://ewb.rice.edu/</a>). Leadership positions are often available to freshmen and sophomores of all of these organizations.</p>
<p><b>INTERESTING COURSES FOR NON-MAJORS</b></p>	<p>MECH 454 Computational Fluid Mechanics          MECH 498 Introduction to Robotics          MECH 594 Introduction to Aeronautics</p>

SPECIALIZATION CLUSTER	3	Mech Area Cluster Course #2
SPECIALIZATION CLUSTER	3	Mech Area Cluster Course #3

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

- When registering for PHYS 101, you must also register for PHYS 103, the discussion section for 101.
- When registering for PHYS 102, you must also register for PHYS 104, the discussion section for 102.

# STAT

## Statistics

<b>WEB LINKS</b>	<a href="http://statistics.rice.edu/undergraduateprogram/">http://statistics.rice.edu/undergraduateprogram/</a>
<b>FRANK ADVICE</b>	<p>STAT 310 is a calculus-based introduction to the theory of statistics. Students without AP credit should consider STAT 280 or STAT 305 prior to STAT 310 in order to develop background in statistical concepts. These courses are not a prerequisite for STAT 310 but we find that students who have some familiarity with statistics when they enter STAT 310 are able to glean more from the course and perform better. STAT 310 is very different from AP statistics.</p> <p>STAT 410 is a calculus-based introduction to regression.</p> <p>STAT 410 requires STAT 310 or STAT 312 as a prerequisite. A background in linear algebra is very helpful for STAT 410.</p>
<b>ADVICE FOR STUDENTS WITH AP CREDIT</b>	<p>Many courses beyond STAT 310 use the statistical computing package, R. STAT 405 is a course on R and should thus be taken as early as possible.</p> <p>AP credits are respected at the level of STAT 280 (introductory statistics course).</p> <p>Engineering students with AP credits should consider taking STAT 310 or STAT 312. STAT 310/312 prerequisites are very important; do not attempt 310/312 until they have all been satisfied. Science and/or PreMed students should consider STAT 305.</p>
<b>ALTERNATIVE CURRICULA</b>	<p>Double majors are welcome to select several “specialization electives” that coordinate with their other majors. Such courses should contain a statistical component in order to earn credit as statistics electives. Talk with an advisor prior to registering for these courses.</p>
<b>BS VERSUS BA</b>	<p>STAT only offers a B.A. degree.</p>
<b>NOT REQUIRED BUT HIGHLY RECOMMENDED COURSES</b>	<p>Students interested in “data analytics” should consider STAT 405 and 444. Students with Bioinformatics or Systems Biology interests should consider STAT 423 (contact Profs. Kimmel, <a href="mailto:kimmel@rice.edu">kimmel@rice.edu</a>, Guerra, <a href="mailto:rguerra@rice.edu">rguerra@rice.edu</a>, or Vannucci, <a href="mailto:marina@rice.edu">marina@rice.edu</a>). Students with Computational Finance interests should consider STAT 482, 486, STAT 421 (contact Prof. Ensor, <a href="mailto:ensor@rice.edu">ensor@rice.edu</a>).</p>

<p><b>RESEARCH</b></p>	<p>Many STAT majors participate in undergraduate research. If there is a professor whose research interests you, ask him or her if you may join his or her research group.</p> <p>Summer research opportunities on and off campus are also possible. Talk with an advisor for more information or visit the department's web page of undergraduate opportunities: <a href="http://statistics.rice.edu/opportunities/">http://statistics.rice.edu/opportunities/</a>. Deadlines for summer opportunities may be as early as Jan-Feb.</p>
<p><b>INTERNSHIPS</b></p>	<p>Summer internships are often available. These may or may not be paid. Talk with an advisor for more information or visit the department's web page of undergraduate opportunities: <a href="http://statistics.rice.edu/opportunities/">http://statistics.rice.edu/opportunities/</a>. Deadlines for summer may be as early as Jan-Feb.</p>
<p><b>PROFESSIONAL ORGANIZATION</b></p>	<p>Houston Area Chapter of American Statistical Association (HACASA) welcomes student participants at their meetings. See <a href="http://community.amstat.org/houston/home">http://community.amstat.org/houston/home</a> for details.</p>
<p><b>INTERESTING COURSES FOR NON-MAJORS</b></p>	<p><b>General</b>  STAT 312 Probability and Statistics for Engineers  STAT 385 Methods of Data Analysis and System Optimization  STAT 405 Statistical Computing and Graphics  <b>Bio/EnvSci</b>  STAT 313 Uncertainty &amp; Risk in Urban Infrastructures  STAT 423 Probability in Bioinformatics and Genetics  STAT 485 Quantitative Environmental Decision Making  <b>Financial Statistics</b>  STAT 486 Market Models  STAT 421 Applied Time Series and Finance</p>

# B.A. Statistics

**Specializations:** Finance, Biostatistics/Bioinformatics and Environment.

Students interested in an early start to statistics should consider taking STAT 280 or 305 followed by 385 as early as the freshman year. These courses are less mathematical than STAT 310 and 410 but are excellent in developing foundations in statistics and data analysis skills.

## Sample Degree Plan

*THIS IS ONE EXAMPLE OF MANY POSSIBLE SCHEDULES.*

*CONSULT A DIVISIONAL OR DEPARTMENTAL ADVISOR TO CUSTOMIZE YOUR DEGREE PLAN.*

FALL				SPRING			
<b>FRESHMAN</b>		17 credits		<b>FRESHMAN</b>		16 credits	
MATH 101	Single Variable Calculus I	3		MATH 102	Single Variable Calculus II	3	
STAT 280	Elementary Applied Statistics	4*		COMP 182	Algorithmic Thinking	4	
FWIS	Freshman Writing	3			or 140/180/215		
OPEN	Open elective	3		DIST	Distribution Elective	3	
OPEN	Open elective	3		OPEN	Open elective	3	
LPAP	Lifetime Phys Activity elective	1		OPEN	Open elective	3	
<b>SOPHOMORE</b>		15 credits		<b>SOPHOMORE</b>		15 credits	
MATH 212	Multivariable Calculus	3		STAT 405	Stat Computing and Graphics	3	
STAT 310	Probability and Statistics	3		SPEC	Special elective	3	
DIST	Distribution elective	3		DIST	Distribution elective	3	
OPEN	Open elective	3		OPEN	Open elective	3	
OPEN	Open elective	3		OPEN	Open elective	3	
<b>JUNIOR</b>		16 credits		<b>JUNIOR</b>		15 credits	
STAT 410	Linear Regression	4*		SPEC	Specialization elective	3**	
MATH 355	Linear Algebra	3		SPEC	Specialization elective	3	
DIST	Distribution elective	3		SPEC	Specialization elective	3	
COMP 330	Tools and Models–Data Science	3		DIST	Distribution elective	3	
	or 322/382 CAAM 378/440/453/471/519			OPEN	Open elective	3	
OPEN	Open elective	3					
<b>SENIOR</b>		15 credits		<b>SENIOR</b>		15 credits	
SPEC	Specialization elective	3		STAT 450	Senior Capstone Project	3	
SPEC	Specialization elective	3		DIST	Distribution elective	3	
DIST	Distribution elective	3		OPEN	Open elective	3	
OPEN	Open elective	3		OPEN	Open elective	3	
OPEN	Open elective	3		OPEN	Open elective	3	

\* In addition to class hours, these courses have a regularly scheduled lab and/or discussion session that must fit into your schedule.

\*\* STAT 305, and 385 may not count as electives for the statistics major. Students may request approval for one statistics-related course from other departments to count toward the specialization electives.

BASIC REQUIREMENTS	General Math & Science Courses Core Courses in Major	12 20–21
ELECTIVE REQUIREMENTS	Specialization Electives Open Electives and LPAP FWIS and Distribution Courses	18 45–46 24
Minimum credit required for the B.A.		120

Of the 120 total degree credits, the BA in Statistics requires 50–51 credits in general math and science, core, and specialization area courses.

## Major Requirements

NUMBER	CREDIT	TITLE
MATH 101	3	Single Variable Calculus I
MATH 102	3	Single Variable Calculus II
MATH 212	3	Multivariable Calculus
MATH 355/CAAM 335/336	3	Linear Algebra /Matrix Analysis/ Differential Equations for Science and Engineering
STAT 310	3	Probability and Statistics **
STAT 410	4	Linear Regression
STAT 405	3	Statistical Computing & Graphics
STAT 450	3	Senior Capstone Project
COMP 140/180/182/215	4	Computational Thinking/Principles of Computing/ Algorithmic Thinking/ Introduction to Programming
COMP 322/330/382 or CAAM 378/440/453/ 471/519	3–4	Fundamentals of Parallel Programming/ Tools and Models-Data Science/ Reasoning About Algorithms or Intro to Operations Research and Optimization/ Applied Matrix Analysis/ Numerical Analysis/ Numerical Analysis I/ Linear and Integer Programming/Computational Science I
SPEC	3	Specialization elective
SPEC	3	Specialization elective
SPEC	3	Specialization elective
SPEC	3	Specialization elective
SPEC	3	Specialization elective
SPEC	3	Specialization elective
<p><i>STAT 305 and 385 may not count as electives. One statistics-related course from other departments may qualify as electives, with advisor approval.</i></p>

# REQUIREMENTS FOR BACHELOR'S DEGREES

Below is a checklist for some of the requirements for earning a bachelor's degree from Rice that apply to ALL majors. The Rice University General Announcements is the final authority on all academic regulations, including those pertaining to degree and major requirements. See "Information for Undergraduate Students: Graduation Requirements" in the Rice University General Announcements for more details and additional requirements. See <http://rice.edu/catalog/>, then Undergraduate Students, then Graduation Requirements.

Major requirements are specified by the department or program; for example, the specific math and science courses, core engineering courses, and engineering electives that you must complete to be awarded a degree in a given major.

Degree requirements are specified by the university; for example, the number of semester hours that must be taken to satisfy distribution requirements or the portion of upper-level course hours that must be taken at Rice.

## General Rice Degree Requirements

In order to graduate with a bachelor's degree from Rice University, you must:

- Be registered at Rice full time for at least four full fall and/or spring semesters.
- Complete the requirements of at least one major degree program.
- Complete at least 120 semester hours (some degree programs require more than 120 hours).
- Complete at least 60 semester hours at Rice University.
- Complete at least 48 hours of all degree work in upper-level courses (at the 300 level or higher).
- Complete more than half of the upper-level courses in degree work at Rice.
- Complete more than half of the upper-level courses in your major work at Rice (certain departments may specify a higher proportion).
- Complete all Rice courses satisfying degree requirements with a cumulative grade point average of at least 1.67 or higher.
- Complete all Rice courses satisfying major requirements with a cumulative grade point average of at least 2.00 or higher.
- Satisfy the English composition requirement.
- Satisfy the Lifetime Physical Activity Program requirement.
- Complete courses to satisfy the distribution requirement.

# ENGINEERING COURSES

## ACCESSIBLE TO FRESHMEN

---

For course descriptions, see <http://rice.edu/catalog/>  
then Courses of Instruction.

### **THERE ARE NO PREREQUISITES FOR THESE COURSES:**

---

ENGI 120	Introduction to Engineering Design (Fall/Spring)
BIOE 202	Careers in Bioengineering (Spring)
CEVE 101	Fundamentals of Civil and Environmental Engineering (Fall)
CEVE 307	Energy and the Environment (Fall)
CEVE 322	Engineering Economics (Spring)
COMP 140	Computational Thinking (Fall)
COMP 130	Elements of Algorithms and Computation (Fall)
COMP 160	Introduction to Computer Game Creation (Fall)
COMP 162	Introduction to Game Content Creation (Fall)
ELEC 220	Fundamentals of Computer Engineering (Spring)
MSNE 201	Introduction to NanoEngineering (Fall)
STAT 100	Data, Models and Reality: An Introduction to the Scientific Method

### **THESE COURSES HAVE MINIMAL PREREQUISITES:**

---

ENGI 140	Engineering Leadership Development
ENGI 242	Communication for Engineers
CAAM 210	Introduction to Engineering Computation (Fall/Spring)
ELEC 240	Fundamentals of Electrical Engineering I lab (Fall)
ELEC 241	Fundamentals of Electrical Engineering I (Fall)
MECH 200	Classical Thermodynamics (Spring)
MECH/CEVE 211	Engineering Mechanics (Fall/Spring)
STAT 305	Introduction to Statistics for Biosciences (Fall)
STAT 310	Probability and Statistics (Fall/Spring)
STAT 312	Probability and Statistics for CEVE (Fall)
STAT 331	Applied Probability (Spring)
